Speaker Biography

Patrick J. Denard, MD

A native Oregonian, Dr. Denard has been voted one of the top 20 shoulder surgeons in North America and is the most widely published shoulder specialist in Oregon. Dr. Denard has advanced arthroscopy training and is able to perform the vast majority of shoulder procedures in a minimally invasive fashion, including all types of rotator cuff repairs and instability repair. These techniques allow him to repair tears that some consider "irreparable." In addition, he performs anatomic and reverse shoulder replacements for shoulder arthritis.

"I am inspired by helping people get back to doing the things they enjoy."

In addition to his position at Southern Oregon Orthopedics, Dr. Denard is an instructor at Oregon Health & Science University, and is the Director of Shoulder and Sports Medicine at Providence Medford. He continues to participate in research, presenting this nationally and internationally and regularly instructs other orthopedists at courses on the shoulder. He is also the co-author of a textbook on shoulder surgery: "The Cowboy's Companion: A Trail Guide for the Arthroscopic Shoulder Surgeon" (get it on Amazon), which provides step-by-step instructions for orthopedic surgeons performing shoulder arthroscopy.
