

VAHID ENTERARI, MD

After receiving his medical degree abroad, Dr. Entezari joined Harvard Medical School's orthopaedic biomechanics laboratory in Boston for a post-doctoral research fellowship in orthopaedic biomechanics. During the same period he completed a post-graduate Masters Degree in Translational Research from Harvard Medical School. He then completed his internship and residency at the department of orthopaedic surgery at Cleveland Clinic and a fellowship in shoulder and elbow surgery at Rothman Institute of Thomas Jefferson University. He returned to Cleveland after completing his fellowship and joined the Clinic as a staff shoulder and elbow surgeon. He is currently seeing his patients at the Cleveland Clinic Main Campus and Solon Family Health Center and operates at both Cleveland Clinic Main Campus and Marymount Hospital located at Garfield Heights neighborhood. Dr. Entezari's interests in shoulder and elbow pathology include rotator cuff tears; other tendon and ligament problems, sports related injuries, arthritis and trauma. He performs shoulder arthroscopy, muscle transfers, fracture repair and arthroplasty including full and partial joint replacements. Dr. Entezari is very active in shoulder and elbow research and has authored a number of publications, several book chapters and regularly presents his research at regional and national conferences.
