# WELCOME TO SHOULDER360™

Dear Shoulder360™ Attendees,

Thank you for joining us for the 3rd Annual Shoulder360™ meeting in South Beach, Miami. Since its inception, our vision has been to have a meeting that disrupts the norm of in-person meetings. Attendees want to attend a meeting where they receive real value for their time and money - including the content, access, and entertainment. They want to meet and engage with the faculty - to get to know their colleagues from around the world in a meaningful way. Our Industry partners want to be able to showcase their latest and greatest products to discerning users, who are going to want to engage with them in-person, ask challenging questions, and demand the best for their patients. Our educational approach for Shoulder360™ will be to always have an emphasis on education in a fun and welcoming environment.

South Beach Miami has so much to offer our attendees. From beautiful beaches to great restaurants and shopping, Miami has an eclectic array of opportunities for family or solo fun, not to mention, easy airport access for those flying in from across the country and the world. There's also no denying the great weather in Miami this time of year.

During the meeting, you will see that the pace is fast, with plenty of time for discussion. We will be incorporating our feared trademarks- judges and a gong, and asking for constant audience participation. There will be some great talks and maybe some not so great ones. However, we will always be true to the Shoulder360™ brand and be honest and provide immediate feedback to our faculty and attendees. As course directors, we have sweated every detail of this meeting. We want everyone to receive the greatest value for their time whether that be as a faculty member, attendee, or industry partner. We realize you could spend your time many ways, but we are grateful that you chose to spend it with us. We hope attending Shoulder360™ in South Beach Miami will continue to be a regular occurrence for you in years to come. We are honored to have you here with us, and we hope to meet each of you during the course. Please know that we are at your service should you need anything. Lastly, all faculty should fear the GONG!

Sincerely,

Joseph Abboud, MD, Raffy Mirzayan, MD & Paul Sethi, MD  
Shoulder360™ Co-Directors

# ABOUT SHOULDER360™

Shoulder360™ aims to provide a comprehensive shoulder course focusing on shoulder repair and reconstructive surgery. Shoulder360™ will redefine the way we think about surgical education of the shoulder. The course will encourage new methods to engage attendees, encourage participation, and utilize new educational technologies for a more interactive experience.

## **PURPOSE**

Shoulder360™ aims to educate the spectrum of healthcare providers caring for patients with shoulder disorders. The target audience will be practicing surgeons and surgeons in training, nurses, physician assistants, and physical therapists with a practice focused on shoulder disease. Shoulder360™ wants participants to learn about the newest and best ways to treat their patients while enjoying a setting designed to foster lifelong friendships and collaboration.

## **LEARNING OBJECTIVES**

- Evaluation of techniques and technologies being utilized in shoulder arthroplasty
- Learn about the continuum of care as it relates to the management of rotator cuff disease and glenohumeral instability.
- Advance the field of shoulder surgery through the introduction of new research by thought leaders.
- Educating the participants on the latest and most current treatment techniques in shoulder arthroplasty, sports and trauma surgery
