

DANIEL ACEVEDO, MD

Dr. Acevedo grew up in Southern California and attended UC Irvine for his undergraduate and medical school training. He decided to become an orthopedic surgeon because he was fascinated with anatomy and enjoyed working with his hands. In medical school, he was elected to the Alpha Omega Alpha Honor Medical Society, and earned numerous awards for scholastic and clinical achievement. After medical school, he pursued training in orthopedic surgery at LAC+USC Medical Center, where he was administrative chief resident. Dr. Acevedo then traveled to Philadelphia to complete a shoulder and elbow surgery fellowship at Thomas Jefferson University Hospital.

During his fellowship, he received advanced training in shoulder and elbow replacements, shoulder and elbow arthroscopy, shoulder and elbow instability, upper extremity fractures, rotator cuff repairs, tendon transfers for the shoulder, and sports injuries surrounding the shoulder and elbow, including Tommy John surgery, also known as ulnar collateral ligament (UCL) reconstruction. In addition to the shoulder and elbow, he treats both operative and non-operative fractures throughout the body. He has published numerous book chapters, journal articles, and surgical training videos for shoulder and elbow surgery. He incorporates evidence-based practices with the latest medical research and cutting-edge treatments to provide my patients the best possible care.

Dr. Acevedo thrives by maintaining a healthy balance between work and family. He enjoys spending time with his beautiful wife and wonderful children. He believes that a well-balanced, active lifestyle is the key to a fulfilled life. He stays fit by jogging, cycling, weight training, and golfing.
